

**Power and fiber optic and RF pneumatic rotary joints reliable for power and data and air transmission**

In many applications, a rotary joint is required not only to deliver power but also power, data signal, gas or liquid together in one integrated rotary joint.

To respond to the rising market for integrated solutions, JINPAT has developed a broad range of integrated products with combinations of data, power and air in multiple mechanical configurations to meet your application needs.

Model	Power	FORJ	FORJ Insertion Loss	RF	RF Insertion Loss	OD x L(mm)
