

## Capsule Slip Ring LPC 12C

This unit can be used in any electromechanical system that requires unrestrained, continuous rotation while transferring power or data from a stationary to a rotating structure. The LPC-12C capsule slip ring is a standard, off-the-shelf unit that uses gold contacts at the rotary interface. Color-coded lead wires are used on both the stator and rotor for simplifying electrical connections.

Using a 90° V-groove ring design for each ring, the LPC-12C provides smoother running, lower torque and lower electrical noise than competitive slip rings. It is available in 6, 12 circuits model.
