

Miniature Capsule Slip Ring LPM-06G

This unit can be used in any electromechanical system that requires unrestrained, continuous rotation while transferring power or data from a stationary to a rotating structure. It's the key apparatus of various precision rotary worktable, electric test instrument, manufacture and process control instrument.

The LPM-06G miniature slip ring is a standard, off-the-shelf unit that uses gold contacts at the rotary interface. Color-coded lead wires are used on both the stator and rotor for simplifying electrical connections. The LPM-06G allows tremendous flexibility in dealing with system size restrictions. It is available in 1 to 6 circuit configurations.
