2 POWER LEDs, 500 Lumen
aluminium die cast housing
lens made of Polycarbonat
extreme small profile
waterproof housing
12V-36V
including cable 0,5m open end or
cable 0,2m + AMP SUPER SEAL
connector or
cable 0,2m + DEUTSCH DT connector
ADR-approved, IP6K9K

Description

Tags

The PRO-MINI-ROCK 500 LED work light inherited many fantastic features from its more powerful sibling. These include the solid aluminium injection moulded housing, an operating range of between 12 and 36 volts, and protection against dust and water demonstrated by its IP6K9K rating. Two integral LEDs generate 500 lumen of light – it's all in the name. Overall consumption is just 6.5 watts at 12 and at 24 volts. In winter snow or summer sun, the PRO-MINI-ROCK work light performs reliably as long as temperatures fall within the range of -30° and +50° Celsius.
